github.com/Hanzala095

Education

BS Artificial Intelligence

Pak-Austria Fachhochschule Institute of Applied Sciences & Technology, Haripur
2023 – Present

ICS

Base Group of College, Wahcantt
2021 – 2023

Matriculation

Sir Syed High School & College, Wahcantt
2019 – 2021

Skills

AI & Machine Learning

Machine Learning, Deep Learning, Generative AI, Computer Vision, NLP, RAG, ANN / RNN / LSTM, Affective (Emotional) AI

Frameworks & Tools

TensorFlow, Keras, OpenCV, LangChain, Flask, Streamlit

Programming

Python, C++, SQL, HTML/CSS

Other

Git & GitHub, Cybersecurity Basics, Web Scraping

Languages

Urdu – Native

English – Proficient

Certifications

Google Cybersecurity Specialization
Coursera / Google, 07/2024

About Me

Aspiring AI/ML engineer and BS Artificial Intelligence student who turns research curiosity into working systems. Across three internships, I have built real-time emotion-recognition pipelines, deployed TensorFlow/Keras vision models for industrial safety monitoring, and engineered a custom client-server network protocol from the ground up. I combine solid engineering fundamentals in Python, C++, and Flask with a genuine interest in emotion-aware and human-centred AI – from Generative AI and RAG pipelines with LangChain to policy-driven decision systems and interactive Streamlit dashboards. Currently seeking internships and research collaborations where I can help build AI that is both technically rigorous and genuinely useful.

Work Experience

AI & ML Internee

ITSOLERA Pvt Ltd, Islamabad

Jun – Aug 2025

Built a real-time facial-emotion detection system and supported applied ML experimentation, including time-series forecasting work.

AI & ML Internee

Arch Technologies, Islamabad

Jun – Jul 2025

Contributed to AI/ML project development, strengthening practical skills in model building and deployment workflows.

Web Programmer

Pakistan Ordnance Factory, Wahcantt

Jul – Aug 2024

Web development, Python coding, and C++ programming projects.

Police Internee

Rawalpindi Police, Rawalpindi

Aug 2025

Projects

Factory Compliance Monitoring System. An end-to-end AI solution combining Computer Vision, Deep Learning, and policy-based decision making to monitor workplace safety. Detects safe/unsafe behaviors with TensorFlow & MobileNetV2, parses occupational safety policies into structured rules (PyMuPDF), maps predictions to relevant policies, assigns violation severity, logs incidents to SQLite, and reports through an interactive Streamlit dashboard.

HealthCheck Protocol (HCP). A custom application-layer network protocol, designed and implemented from scratch for the Computer Networks course (COMP-352). Supports live status checks, CPU/RAM/disk metrics via psutil, threshold-based alerts, secure configuration updates, and full client-server communication over TCP – built with Python sockets and threading, complete with architecture diagrams and testing documentation.

Emotion-Based Music Recommendation System. Real-time facial emotion detection system, developed during the ITSOLERA internship, that recommends music matching the user's mood.

AI Cybersecurity Advisor. A smart web-based assistant that analyzes website URLs, checks for password breaches, and delivers AI-powered cybersecurity advice.
